Section C – Project Details

1. Justifications for the Project

- (a) Please state the justifications for the Project in about 200 words. The Project's expected benefits and contributions to the objective(s) of PASS should be listed out. Evidence of the practical use of the expected deliverables to the professional services concerned, if any, should be provided. The description should be presented in clear and concise terms and in point form.

- A survey on professional development for electrical engineering services was conducted by AHKEE in December 2017. The survey findings (extract of the report is attached) reveal a strong need for –
 - (i) proactive promotion of Hong Kong's electrical engineering services in the Mainland China as there is huge market opportunities in the Mainland China according to the Trade Development Council's market report at (extract of the report is attached); and
 - (ii) more in-depth understanding of the market environment (e.g. latest market trends, challenges and opportunities) of the Mainland China.
- As a follow up, we plan to conduct one visit to help enhance Hong Kong electrical engineers' understanding of the challenges and opportunities in the Mainland China, promote Hong Kong's electrical engineering services to the Mainland China, and increase the exchanges and co-operation of Hong Kong's electrical engineering services with their counterparts in Mainland China. The destination city will be Beijing. The city is selected for the proposed visit because it is the centre point and many international firms have set up headquarters there.
- The proposed deliverables will be shared among Hong Kong's electrical engineers, which will help enhance their understanding of the market environment of the Mainland China. There are about 5 000 electrical engineers in Hong Kong. It is expected that they will be benefited from the findings of the proposed visit, which will be uploaded onto AHKEE's website. Moreover, the promotion of Hong Kong's electrical engineering services through the proposed visit will pave way for long-term co-operation and collaboration with their counterparts in this place.

- (b) Please describe similar project(s) in the market or organised by the Applicant in the past, and explain why the proposed Project and funding requirements are justified and may bring added value despite such similar projects. Information to confirm that the proposed Project is not part of the Applicant's normal business activities or in fulfilment of its official duties (e.g. due to being a member of certain organisation); otherwise grant under PASS would not be available.

A number of local engineering associations organised visits to the Mainland China in the past, but with very limited coverage on electrical engineering services.

The proposed visit would examine the market situation (with a focus on regulatory and licensing requirements) in the Mainland China and such information is crucial for the sector to fully tap into the market opportunities in the Mainland China. It also provides valuable opportunities for Hong Kong's electrical engineering services sector to promote and increase the exchanges with their counterparts in the Mainland China. The proposed visit will benefit the sector and pave way for long-term co-operation and collaboration with their counterparts in the Mainland China. PASS funding is vital for the successful implementation of the proposed project, which is much beyond the scope of AHKEE's day-to-day activities.

- (c) Please provide details on any self-funded activities organised by the Applicant that are similar or related in nature, content, timing or target participants to the Project, within a period of six months before or after the Project Duration.

Not applicable

- (d) If applicable: If the application is proposed to be processed urgently, i.e. outside the general application and assessment cycle⁸, please provide justifications, including problems arising from the deferred implementation of the Project.

Not applicable

⁸ Information on the general application and assessment cycle is available at the PASS website.

The aggregate amount of such contribution must be equivalent to at least 10% of the approved Project Cost. Contributions can either be in cash or in-kind.

²⁰ For an application submitted by a Government-subvented organisation, the Applicant must secure cash contribution from non-subvented organisation(s) or company(ies) in the private sector and the amount must not be less than 5% of the approved Project Cost.

Manpower cost of existing staff in a Government-subvented organisation can be included in the Project Cost and considered as a contribution in-kind by the Government-subvented organisation. However, any grant approved under PASS must not be used to finance such manpower cost.

For any proposed in-kind contribution from the Grantee and/or through third party sponsorship for an item (excluding existing manpower), the full amount of the item must be funded by the Grantee and/or third party sponsorship as the in-kind contribution and application for partial funding under PASS for such in-kind contribution is not allowed. Subject to the foregoing, in-kind sponsorship(s) can be sourced by phases. In assessing the monetary value of manpower contribution, references will be made to the actual salary of the existing staff deployed for the Project.

²² While only non-profit making projects are eligible under PASS, project income (e.g. admission fees and course enrolment fees) may be counted towards the Grantee's contribution to the Project Cost. Where appropriate, the Grantee may charge fees for the use of Project Deliverables. However, the fee level must not be higher than the cost. Please set out the basis or assumptions (and provide supporting document, if applicable) on which the project income figures are calculated (e.g. prevailing market prices).

In case the actual project income is lower than expected, the Grantee must cover the shortfall by additional cash contribution. PASS will not provide any additional funds. Nevertheless, in case the actual project income is higher than expected, the Grantee must return the surplus project income, but up to the amount of the PASS grant plus the interest generated from the Project Account.
